## Control Options

### Child Safe Manual Solution

The Contract Series roller shades can be paired with a Chainhold tension device to provide a child safe mechanism for chain operated shades, which ensures compliance with the ANSI/WCMA A100.1-2022 safety standard. The durable construction and sleek engineered design ensures smooth, reliable performance.

### Cordless Spring Operated Solution

Easy Spring Air is a chain free child safe roller shade, effortlessly controlled by raising or lowering the bottom rail to the desired position. The premium minimalist design of the Easy Spring Air has eliminated the need for chains or wand devices.

### Wire Free Motorized Solution

Wire free motorized shades are quiet, rechargeable and offer premium automated control at your fingertips via our stylish range of remote controls. The patented design conceals an antenna cable, leaving no visible wires. Stand out features include soft stop technology with slower, quieter closing operation and a battery check function on the remote control.

# Fabric Options

## Light Filtering & Blackout Solution

Kleenscreen Light Filtering and Blackout roller shade fabrics are enhanced with Sanitized®, an antimicrobial technology that inhibits the growth of bacteria, mold, and mildew. This ensures a healthier environment while keeping your shades fresh.

Our Light Filtering fabric features 8 contemporary colors crafted from a 2x1 basketweave, all available in 1%, 3%, and 5% openness.

Kleenscreen Blackout combines the durability of solar screens with 100% blackout performance—no delicate coatings required. Easy to clean, weld, and it pairs seamlessly with our Light Filtering options.

Elevate your space with the Kleenscreen Collection, where style meets hygiene.
